MORE INFORMATION ON THE PRODUCT

DESIGN

- The door armour, made of the selected type and colour of aluminium slats, is wound onto a covered shaft and thus does not create any obstruction on the garage ceiling.
- The safety bar, in combination with the remote control, prevents accidents or damage to your property.
- The ceiling of your garage or hall remains free.
- Use up to 5.5 x 4 m (max. 16 m²).

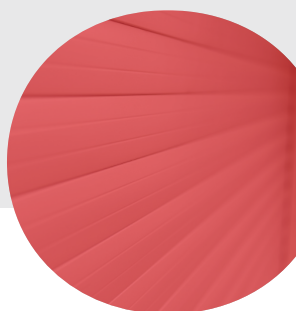

FEATURES

- The polyurethane-filled profiles have excellent thermal insulation properties, are very stable, and provide protection against burglary.
- The filling materials are highly resistant to weather.
- The range includes several types of filling, and the possibility to illuminate the closable space.

ASSEMBLY

- The door can also be mounted from outside, saving internal space by the width of the wall.
- The door offers the possibility of ventilation with ventilation grilles.
- The door can be made partly translucent with special windows.

CONTROL

- The possibility to choose between different types of switch and a remote control (or a combination) will meet all your requirements.
- It is possible to connect to a central system for controlling the roller shutters and doors.
- The possibility of a manual emergency control in the case of a power failure.
- The remote control can be combined with other elements, for example, other doors.
- The door can be designed with various technical accessories on request.

APPLICATION

- Suitable for garages of homes or company buildings, as well as industrial facilities.
- The design can be matched with existing external window and door roller shutters.
