MORE INFORMATION ON THE PRODUCT

DESIGN

- The guide rails are made of PVC.
- The box inspection flap is from the interior and must be kept accessible.
- No space is required in front of the frame from the exterior.
- The plastic box and the guide rails can be fitted with Renolit film in a wide range of colours and wood veneers.

ASSEMBLY

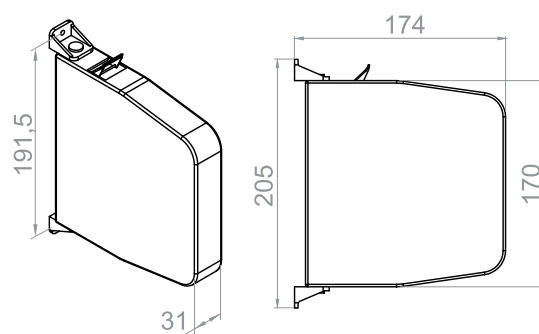

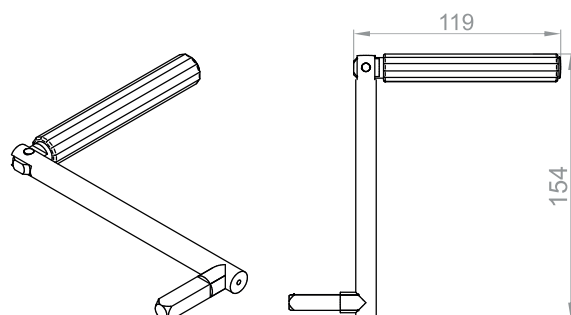

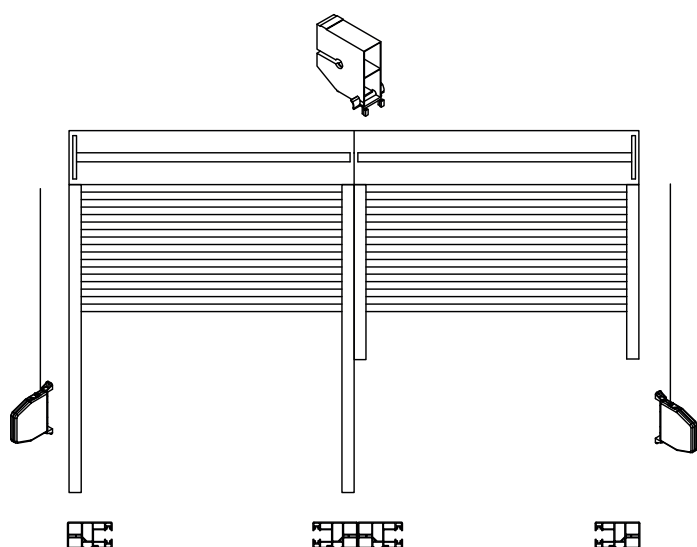

- Installation is carried out simultaneously with the installation of the windows.
- The plastic roller shutter box is mounted above the window frame and this unit is then fitted into the window opening.
- After the window is anchored, the guide rails are installed.
- Installation of the control is completed from the interior.

MOTORISED CONTROL

- Use of **SIMU, SOMFY** tubular motors.
- The motors are located in the shaft.
- Control via switch, radio transmitter, or centrally.
- **Smart control** – via your phone or tablet.

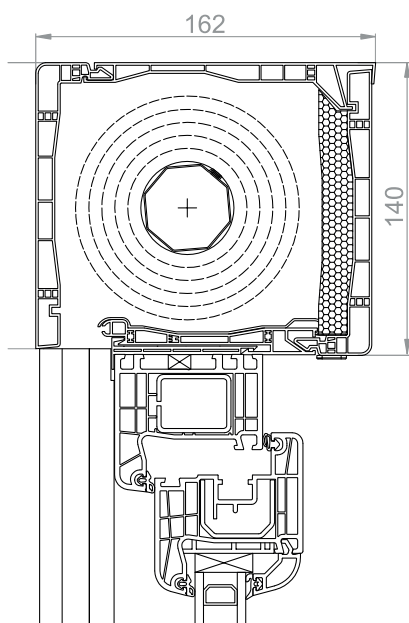

MANUAL CONTROL

- Up to an armour weight of 10 kg – a winch with cord or tape, attachment to the window frame or to the jamb.
- Up to an armour weight of 10 to 18 kg – a strap with handle, mounting on the wall or to the jamb.
- Armour weight over 18 kg – gearbox with a handle or motor.
